SIBULELE MJAVU

INFORMATION TECHNOLOGY ENTHUSIAST & ASPIRING CYBERSECURITY ANALYST | PYTHON, C#, FLUTTER | MOBILE & WEB DEVELOPER | South Africa | mjavusibulele@gmail.com| +27 69 994 7924 | Fourways, Johannesburg github.com/mjavuSibu| mjavusibu.github.io

PROFESSIONAL SUMMARY

Information Technology graduate and Cybersecurity enthusiast. I enjoy bringing ideas to life through solutions that are practical, reliable, intuitive, and meaningful to the people who use them. As I continue to grow professionally, I'm building towards a career where Software development, Cybersecurity, and Innovation come together to create secure technology solutions. Disciplined, quick to learn, and genuinely motivated to grow through a Graduate Program or structured mentorship.

PROFESSIONAL & TECHNICAL SKILLS

Software Development: Python, C#, Dart, Flutter, ASP.NET Core MVC, HTML, CSS, GitHub, VS Code, Android Studio, PyCharm

Cybersecurity: Network security, traffic monitoring, vulnerability scanning, Cisco Packet Tracer, POPIA compliance, ISO/IEC 27001, NIST Cybersecurity Framework, incident response planning

Computer Literacy: MS Office Suite (Word, Excel, PowerPoint).

Testing and QA: Functional testing, bug identification and resolution, iterative refinement based on user feedback

Soft Skills: Team collaboration, adaptability, independent and supervised work, written and verbal communication, documentation and technical reporting, detail-oriented, time management

PROJECTS

Real-Time Audio Detection System (HearMe) | Python · TensorFlow · YAMNet · Flutter · WebSocket

- Built an AI-powered sound recognition platform for deaf and hard-of-hearing users that continuously classifies environmental sounds through a device microphone using machine learning, delivering a Python desktop backend operating in real time.
- Implemented TensorFlow and YAMNet for live audio classification, streaming results via WebSocket with vibration and push notification alerts on the mobile side.

Health Monitoring System Web Application (HealthSpark) | ASP.NET Core MVC · C# · Firebase · Claude API

- Delivered a multi-portal digital health platform from inception to deployment, with dedicated access levels for patients, doctors, and administrators.
- Integrated AI-assisted symptom assessment and interactive reporting dashboards; maintained full technical and user documentation throughout.

AI-Powered Mental Health Chatbot | Python · NLP

- Developed a data collection and response system using NLP to process and classify user input, applying data preprocessing and pattern recognition techniques.

Campus Lost and Found Mobile Application | Flutter · Dart · Firebase

- Designed and delivered a live mobile application used by real students to report, search, and recover lost or found items across campus.
- Gathered user feedback during testing phases, diagnosed and resolved issues, and applied iterative improvements before and after deployment.

EDUCATION

National Diploma in Information Technology | Central University of Technology | Feb 2022 – 2025

Bloemfontein, South Africa

Cybersecurity Analyst (NQF 5) | Jurumani Solutions | In Progress

Midrand. South Africa

CERTIFICATIONS

- Samsung Innovation Campus (2025) – Certified in Artificial Intelligence and Python Coding and Programming
- Microsoft Certified SC-900: Security, Compliance, and Identity Fundamentals
- Cisco Networking Academy – Introduction to Data Science
- Cisco Networking Academy – Introduction to Modern AI
- Cisco Networking Academy – Python Essentials 1
- Cisco Networking Academy – IT Essentials: PC Hardware and Software
- Cisco Networking Academy – Introduction to Cybersecurity

Additional Information

- Code 8 Driver’s Licence
